DESIGN COMMITMENT

Fabric made from the random combination of waste from our production, in every color and fabric that are regenerated into a new textile. The shape of the design depends on the size and geometry of the scraps. The only rule is that the side of each color must not exceed 30 cm. Contact us for the color study!

Felt is characterized by the presence of small dots, linked to the carding process of the fiber-dyed felt. Impurities are most noticeable on light-colored and solid colored felts.

Like the look? Create you own!
The fabric can be customized in colors by combining scraps and new sustainable fabrics.
